# FRANK CARDACI TRAINEESHIP & APPRENTICESHIP PROGRAM

**No experience necessary,  
just a have-a-go attitude!**

Cape Dunstans aims to provide successful career pathways and measurable outcomes by investing in the future generations of Western Australians, both Indigenous and non-Indigenous.

## The Program:

The Frank Cardaci Traineeship and Apprenticeship Program was established in May 2015 and named in honour of the late founder of our CFC Group. Frank believed everyone deserves a chance, just as he and his brothers Carl and Leone were more than fifty years ago. The program is designed to provide life-changing employment opportunities across the group's businesses. It provides financial stability and the chance to gain experience and skills in a practical environment.

## How does it work?

Trainees and apprentices work full-time and have a dedicated mentor and trainer assigned to the business internally and externally. They will be fully supported to complete their traineeship and/or apprenticeship whilst fulfilling meaningful and relevant duties associated with the role.

## Qualifications gained:

- Certificate III Civil Construction
- Certificate III Trenchless Technology
- Certificate III Surface Extraction
- Certificate III Electrotechnology
- Certificate III Heavy Commercial Vehicle Mechanical Technology
- Certificate III Automotive Electrical Technology

## Our commitment:

Cape Dunstans is fully committed to ensuring this traineeship program is effectively planned, resourced and executed to provide the best chances for success.

Support for the communities in which Cape Dunstans operates reflects the values that underpin the company's success.
